

EuroGeoSurveys 50th Anniversary Conference

Date of press release: Brussels, 21 October 2022

Join us at the 50th Anniversary Conference, livestreamed on EuroGeoSurveys' YouTube channel, and explore how we provide geoscience for society.

Background

EuroGeoSurveys (EGS) will hold its 50th anniversary conference on October 27th, 2022. The event will celebrate the longstanding collaboration between 36 regional geological surveys with an overall workforce of several thousand experts, which make up the membership of EGS. Since 1971, the Geological Surveys of Europe have been working together to deliver geoscientific knowledge and data to the European Union institutions to support policy making for the benefit of society. During the anniversary celebration events, EGS will honour their past work and look to the future as they continue to collaborate in developing a path towards a Geological Service for Europe.

Anniversary Description

The 50th anniversary celebration will be held in Brussels between 09:30-17:15 on October 27th, 2022. Please note that attendance is by invitation only. However, the conference will be openly live streamed on the [EGS YouTube channel](#).

The conference will be attended by representatives of the EU institutions, international organisations, industry associations, and international and European national and regional geological survey members, many of whom will lead talks and engage in discussions throughout the event. The talks and discussions will explore prevalent geoscientific topics for society and the role of EGS within them.

The 50th Anniversary Conference programme can be viewed [here](#).

Further Information

To celebrate the 50th anniversary of EuroGeoSurveys, a dedicated podcast series, 50 Years of Geoscience for Society, has been produced. To find out more about EuroGeoSurveys, the work of the Expert Groups and to get to know more about the Expert Group Chairs, the podcast episodes can be found [here](#).

The EuroGeoSurveys brochure detailing the history, the work of the Expert Groups and projects of EuroGeoSurveys can be read [here](#).
